CONFIDENTIAL

xx 11/15/70

Mary, Gary, Howard,

Please, no loose talk, no talk of any kind about this.

I have just learned from a new source that the autopsy head pictures were examined by federal agents.

That is about all I've learned thus far. I have asked a series of questions of my source. It will be some time before he can answer and I have no way of knowing what he can add.

I do know his source and much about him. He is one of those who did the examining. My hunch is that they didn't know enough to interpret what they saw at the time they did it.

As you know, there is another means by which I may be able to carry this forward, but it is premature to try until I know all my source knows. He is not an expert, not a buff, just concerned.

I had always assumed this, as probably at least some of you also did. But knowing that it did happen is better than guessing it.

As you realize, this fits nicely with other things I've learned, relevant things.

Best,
